

Maximize cold vault space and sales.

Optimize unused cold vault space to showcase new products or limited time offers (LTOs) without sacrificing shelf space. The Under Shelf Can Roller positions items at eye level to grab attention while maximizing buyable inventory and enhancing labor efficiencies.

- Avoid out-of-stock situations (OOS) and increase sales and profit
- Easily installs on the underside of the existing shelf without tools
- Wire structure offers long-lasting durability
- Ensure product freshness with first-in, first-out inventory management
- Opportunity to utilize pricing and promotional communication
- Fits can product package sizes 16oz, 12oz slim, 24oz, and 25oz

Keep the most popular SKUs in stock throughout the day and enhance labor efficiencies to meet customer demands during rush hours. You can also use the extra 4" of space that might have been vacant otherwise to promote new products and LTOs.

Increase Profits

Drive impulse purchases with additional quantities of popular and profitable products at **attention-grabbing** eye level.

Easy To Install

Enhance existing angled wire shelves with **no tools required**.

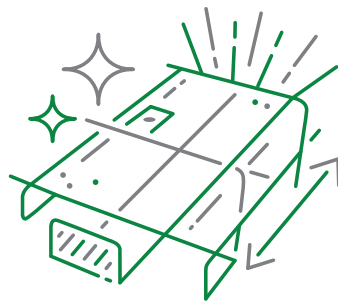

Durability

Robust wire construction provides reliable use for years. With no movable parts to become misaligned, it always lines up perfectly with fixed dividers.

Promotional Messaging

Customizable promotional channel graphics to support new product launches or LTOs without disrupting current selection.

Multiple Depths

Standard and extended depth options maximize shelf capacity and reduce restocking frequency.
